This instruction implements AFMAN 23-110, Vol 2, Pt 2, Chapter 26, Section F and AFI 23-226 and establishes 30th Space Wing (30 SW) policy and procedures for equipping individuals with mobility bags for deployment. It also provides policy to determine requirements, store, issue, account, and report mobility bag assets. This instruction applies to all 30 SW and tenant organizations with mobility taskings.

GENERAL INFORMATION

1.1. Policy. AFMAN 23-110, *USAF Supply Manual*; AFI 32-4001, *Disaster Preparedness Planning and Operations*; and AFI 23-226, *Chemical Warfare Defense Equipment (CWDE) Consolidated Mobility Bag Management*. These documents form the basis for mobility bag management for 30 SW organizations and tenants.

1.2. Objective. The Chief of Supply (COS) through the contractor's Project Manager (PM) will accomplish the following objectives:

- 1.2.1. Maintain centralized, secure storage for mobility bags.
- 1.2.2. Provide base inventory control and accountability procedures.
- 1.2.3. Provide responsive reconstitution of assets returned from deployments.

1.3. Scope. The PM will provide type A, B, and C-1 mobility bags to support only primary Mobility Position Numbers (MPN).

1.3.1. Ensure current shelf-life data, determine requirements, and report CWDE assets for all units geographically located on the installation of the host base supply stock record account number (SRAN).

1.3.1.1. Maintain accountability of all mobility bag assets in Mobility Inventory Control and Accountability System (MICAS).

1.3.1.2. Maintain accountability of all deployed assets.

1.4. Relationship to Other Directives. This instruction provides 30 SW guidance for mobility bags. Other directives also apply (see [Attachment 1](#)).

Chapter 2

MOBILITY BAG REPORTING

2.1. Policy. The PM maintains overall responsibility for reporting mobility bag assets to HQ AFSPC/LGSW. Base supply's Mobility Support Section will ensure the timely preparation, coordination, and submission of required reports. Various miscellaneous reports may be required at the request of HQ AFSPC.

2.2. Mobility Bag Authorizations. Annual requirement, NLT 1 January, submitted by Logistics Plans.

2.3. Mobility Inventory Control and Accountability System (MICAS). Provides asset posture on Type A, B, and C-1 mobility bags to PM and COS.

2.3.1. In addition to providing mobility bag asset posture, MICAS contains a database of all military personnel subject to deployment. This personnel database contains all of the information necessary to create mobility bag hand receipts.

2.3.1.1. To ensure database integrity, the Military Personnel Flight will grant the Mobility Support Section online access to the Base Alpha Roster for screening of military personnel arriving and departing Vandenberg AFB.

2.3.1.2. The Mobility Support Section will protect this information IAW requirements of the Privacy Act.

2.4. Asset Reporting to the Consolidated Mobility Bag Control Center (CMB CC). Base Supply provides quarterly reports to the CMBCC, Beale AFB CA, for replenishment actions under MICAS IAW AFI 23-226.

Chapter 3

GENERAL MOBILITY BAG MANAGEMENT

3.1. Policy. HQ USAF has established three mobility bags: Type A (general purpose), Type B (cold weather) and Type C-1 (CWDE). HQ USAF has also established an A-1 bag, which is required to increase rapid deployment capability. The A-1 bag is derived from the A-bag and consists of individual protective equipment (IPE) IAW AFI 32-4001 and must be deployed with the C-1 bag. Type C-1 bags are required IAW AFI 32-4001 and AFI 23-226. The specific contents of each type mobility and organization bag are listed in [Attachment 4](#) through [Attachment 12](#). These mobility bags will be maintained in standard configuration IAW AFMAN 23-110. Units requiring additional non-standard items are responsible for the storage and maintenance of the items as organizational equipment.

3.2. Mobility Bag Authorizations. Mobility bag authorizations are based upon AFSPC taskings, DOC statements, Operations Plans (OPlan) and safety levels (AFMAN 23-110, Vol 2, Pt 2, Chapter 26).

3.2.1. Logistics Plans Flight will submit mobility bag requirements annually, NLT 1 January or within 60 days after the receipt of a revised or new OPlan, AFSPC tasking, or DOC statement. This validation process is as follows:

3.2.1.1. Logistics Plans will identify total mobility bag requirements (including non-AFSPC tenant units) to the Mobility Support Section (30 SUPF/LGSMM) via the 30 SW/XPL Standard UTC Reference File (SURF) spreadsheet. The Installation Deployment Officer (IDO) will update the SURF annually (1 January) or as significant changes occur.

3.2.1.2. The base supply Mobility Support Section will be responsible for updating MICAS immediately with new authorizations in regards to tariff requirements (see [Attachment 2](#) and [Attachment 3](#)).

3.2.2. Safety levels are established to offset sizing problems related to tariff sizing, unforeseen notional taskings, and slight increases in authorizations. A ten-percent safety level is established for each type of mobility bag.

3.2.3. If existing mobility authorizations do not support mission requirements, i.e. notional taskings, Mobility Support Section will coordinate an increase request via formal correspondence with HQ AFSPC/LGSW.

3.2.4. Out of cycle reviews that warrant change (ten-percent increase/decrease in authorizations) will be forwarded to HQ AFSPC/LGX/LGS for validation; otherwise, mobility bag authorizations will remain firm for one year.

3.3. Mobility Bag Storage. Mobility bags will be centrally stored by base supply.

3.3.1. Mobility bags will be stored in built-up configuration using tariff guidelines (see [Attachment 2](#) and [Attachment 3](#)).

3.3.2. The base supply Mobility Support Section will store and maintain all mobility bag backup stock for the wing, with no exceptions.

3.3.3. Physical maintenance of mobility bags:

3.3.3.1. Mobility bags will have inventory lists, to include shelf-life data, affixed to each mobility bag.

3.3.3.1.1. Pre-printed hand receipts may be used.

3.3.3.2. Mobility bags will not have permanent markings, i.e. squadron or type mobility bag identification.

3.4. A-1 Mobility Bag (Ditty Bag). The A-1 mobility bags will be issued to all unit deployment managers (UDM) based on the organization's total MPNs reported in the SURF. The UDM will in-turn issue, on hand receipts, one A-1 bag to each person assigned as a primary against a MPN.

3.4.1. The A-1 bag will be used for training and real world deployments.

3.4.2. Accountability and reconstitution is the responsibility of each squadron using Operations and Maintenance (O&M) funds.

3.4.3. UDMs will validate the inventory and hand receipts with the Mobility Support Section annually or when there is a change in UDM.

3.4.4. Mobility Support Section will report A-1 bag status in MICAS.

3.4.4.1. The Mobility Support Section will maintain and issue A-1 bags for notional taskings.

3.5. Gas Mask Management.

3.5.1. Gas masks, equal to the total mobility authorization, will be issued by the Mobility Support Section to the organizations' UDMs. Exception: Gas masks identified for Security Forces' MPNs will be stored and maintained by the Mobility Support Section.

3.5.1.1. The serial numbers and lot numbers of the gas masks issued to the UDMs will be used for tracking in MICAS.

3.5.1.2. Gas masks will be immediately inspected by the UDM and the inspection documented on DD Form 1574.

3.5.1.3. Follow up serviceability inspections and documentation, required by TO 14P4-15-1, will be accomplished by the individual issued the gas mask or the UDM.

3.5.2. All gas mask exchanges will be made through the Mobility Support Section by the UDM.

3.5.3. UDMs are responsible for ensuring personnel assigned against MPNs obtain Quantitative Fit Testing (QNFT).

3.5.4. Gas masks are used for training and real world deployments and will not be stored in the C-1 mobility bag.

3.5.5. Hand receipts for gas masks issued to the UDMs will be re-accomplished annually, when there is a change in quantity of gas masks issued, or when there is a change of an organization's UDM.

3.5.6. The Mobility Support Section will maintain and issue gas masks authorized for notional taskings.

3.5.7. The Mobility Support Section will maintain a bench stock of repair parts for gas masks.

3.6. Training Gear. Units will maintain sufficient training equipment to support training and exercise objectives. Air Force policy directs the use of unserviceable CWDE equipment for training purposes and strictly prohibits units from using serviceable assets for this purpose.

3.6.1. All training gear other than CWDE will be purchased with O&M funds. (Exception: SFS will use Air Base Defense Funds.)

3.6.2. CWDE training items will be obtained from unserviceable CWDE and will not be funded. Units will check first with the Mobility Support Section then Defense Reutilization and Marketing Office (DRMO) for CWDE training assets.

3.6.3. All training gear will be marked IAW applicable technical orders and will be stored separately from serviceable assets.

3.7. Special Sized Equipment. The Mobility Support Section will follow special measurement clothing and footwear requisitioning instructions as outlined in AFMAN 23-110, Vol 2, Pt 2, Ch 23 and Vol 1, Pt 1, Ch 25. Requisitions must satisfy all four ensembles (full basis of issue) and an additional ensemble for training purposes IAW AFI 32-4001.

3.7.1. Build the required mobility bag, affix an external tag that identifies the individual and store it separately in the Mobility Support Section.

3.8. Non Tariffed Sizes. Tariff recommendations were developed to support the average requirements. To provide flexibility for extreme size requirements, Mobility Support Section is required to maintain a small quantity of these assets in bulk storage.

3.8.1. Maintain a minimum of 10 pair per size of GVO boots: sizes 3, 4, 15, 16, 17, and 18. NOTE: sizes 15, 16, 17, and 18 GVO boots are currently being stocklisted.

3.8.2. Maintain a minimum of 20 suits per size of BDOs: sizes XX-Small and XX-Large.

3.9. Inspection/Shelf-Life. The Mobility Support Section will perform visual and shelf-life inspections IAW applicable technical orders, AFMAN 23-110, Vol 7, Pt 3, AFI 23-226 and the Soldiers Support Network.

3.9.1. Shelf-life data for the GVO boot is not physically identified on the boot; therefore, Mobility Support will ensure all GVO boots are firmly sealed in the manufacture's bag or similar plastic bag with shelf-life data clearly visible and firmly affixed to the package of each pair. If the manufacturer provides the GVO boots in an unsealed bag it will be sealed with duct tape.

3.9.2. Mobility Support will document all inspections in MICAS.

3.9.3. Additional inspection requirements for gas masks are as follows:

3.9.3.1. Gas masks will be inspected immediately upon receipt and documented on DD Form 1574.

3.9.3.2. Organizations maintaining gas masks will perform inspections in accordance with applicable technical orders.

Chapter 4

FUNDING AND REQUISITIONING MOBILITY BAG REQUIREMENTS

4.1. Policy. The Project Manager will work with the 30 SUPF SMAG to ensure that Operations and Maintenance (O&M) funding is received for mobility bags and support kit shortages under the management and control of supply.

4.1.1. Use shop code MK for type A, A-1, and B mobility bags.

4.1.2. Use shop code CW for CWDE C-1 bags, gas masks and gas mask support kit parts.

4.1.3. Prior to funding shortfalls, the base supply Mobility Support Section will request assistance from HQ AFSPC/LGS for possible distribution of excess assets within the command.

4.1.4. Establish memo due-outs with transaction exception (TEX) code "H" as a baseline to budget for O&M funded mobility bag requirements.

4.1.4.1. If funding is insufficient to purchase all shortfalls, conduct appropriate analysis to ensure the right items are ordered to establish the maximum number of complete mobility bags.

4.1.4.2. Use normal supply procedures for the requisitioning of mobility bag assets.

4.2. Organizational budget requirements. Each 30 SW and tenant organization with a mobility commitment will ensure the annual dollar requirements are included in their O&M financial plan for mobility assets.

4.2.1. Budget for type A and B mobility bag initial and replacement requirements.

4.2.2. Fund for all special sized equipment requirements, which are not stock listed to include CWDE.

4.2.3. Ensure budget submissions for O&M requirements reflect the appropriate host base and tenant organization MAJCOM information.

4.3. Consolidated Mobility Bag Control Center (CMBCC). Will fund for CWDE IAW AFI 23-226.

4.3.1. Replenishment actions will be based upon MICAS reporting and tariff authorizations.

Chapter 5

SECURITY FORCES MOBILITY BAG MANAGEMENT

5.1. Policy. Due to mission requirements, Security Forces are authorized to substitute the standard items in both the A and B mobility bags IAW LOGDET provided to Base Supply and validated annually. All Security Forces mobility bags will be maintained in accordance with this instruction.

5.2. Mobility Bags. The Mobility Support Section store and maintain mobility bag requirements as follows:

- 5.2.1. Security Forces unique A bag (see [Attachment 6](#)).
- 5.2.2. Security Forces unique B bag (see [Attachment 9](#)).
- 5.2.3. Maintain accountability of all assets in MICAS.

Chapter 6

CIVIL ENGINEERING BAG MANAGEMENT

6.1. Policy. Due to mission requirements, Civil Engineering personnel are authorized additional items in both the A and B mobility bags IAW CE ESL provided to Base Supply and validated annually. All Civil Engineering mobility bags will be maintained in accordance with this instruction.

6.2. Mobility Bags. The Mobility Support Section stores and maintains mobility bag requirements as follows:

- 6.2.1. Civil Engineering unique A bag (see [Attachment 7](#)).
- 6.2.2. Civil Engineering unique B bag (see [Attachment 10](#)).
- 6.2.3. Maintain accountability of all assets in MICAS.

Chapter 7

ISSUE, DEPLOYMENT, AND RECONSTITUTION OF MOBILITY BAGS

7.1. Policy. The Base Supply Project Manager is responsible for the deployment of mobility bags stored in base supply. Custodial responsibilities will be assigned to ensure accountability is maintained throughout the deployment.

7.2. Individual Issue of Bags. Deploying individuals will inspect and sign for mobility bags acknowledging serviceability and accountability using AF Form 1297 hand receipt or equivalent.

7.2.1. Place a copy of the hand receipt inside of the mobility bag.

7.2.2. Base Supply Mobility Support Section will maintain an additional copy of the hand receipt pending reconstitution.

7.3. Bulk Issue of Bags. The deploying commander will designate an individual to accept accountability/responsibility for bulk shipped mobility bags.

7.3.1. All mobility bag types are authorized for bulk issue.

7.3.1.1. Base Supply will provide hand receipts (AF Form 1297) to the deploying commander and/or troop commander for each mobility bag issued.

7.3.1.2. Base Supply will retain one copy of the hand receipt signed by the deploying commander to update MICAS.

7.3.2. Ensure mobility bags are returned to the storage activity upon return to home station for reconstitution.

7.4. Mobility Bag Turn-In:

7.4.1. Sleeping bags, cold weather parkas, and other identified equipment must be cleaned prior to turn-in.

7.4.1.1. Turn items into the Base Linen Exchange, ext. 6-6149.

7.4.1.2. After items are cleaned, they will be returned with a cleaning receipt. This receipt is the proof of cleaning and must be provided to the Mobility Support Section. The Mobility Support Section will not accept these items without proof of cleaning.

7.4.2. Gas mask must be thoroughly cleaned using mild liquid detergent and warm water or alcohol based towelettes using a non-scrubbing motion.

7.4.3. All individuals will return their mobility bags to the Base Mobility Support Section. Each mobility bag will be jointly inventoried to determine if shortages exist or replacement items are required because of wear and tear. A copy will be given back to the individual with replacement cost or a release from Base Supply accountability.

7.5. Reconstitution. Upon return from deployments and exercises, base supply Mobility Support Section will be required to reconstitute mobility bags and support kits.

7.5.1. Items used from the A & B mobility bags during deployments and exercises will be charged to the consuming organization's O&M funds.

7.5.1.1. Process a turn-in (TRIC TIN) using the Mobility Bag Element's OCCR, TEX code "8", credit code "Y", and the quantity consumed.

7.5.1.2. Process an issue request (TRIC ISU) using the consuming organization's OCCR and the quantity consumed.

7.5.1.3. Process an issue request (TRIC ISU) using the Mobility Bag Element's OCCR to replenish safety level stock and kits. **NOTE:** Consolidate issues/backorders for Mobility Bag Element replenishments and process at the conclusion of the reconstitution effort.

7.5.2. Complete Financial Liability Investigation of Property Loss IAW AFMAN 23-220, on all mobility bags not returned within 60 days of return to home station.

7.5.2.1. The base supply Mobility Support Section will attempt to recover the mobility bag before requesting the organization's UDM to submit a DD Form 200.

MITCHELL P. SLATE, Colonel, USAF
